

HYUNDAI

Rettungsdatenblätter für Rettungskräfte

Hinweis:

Diese Rettungsdatenblätter wurden ausschließlich für Rettungskräfte erstellt, die über eine spezielle Ausbildung auf dem Gebiet der technischen Hilfeleistung nach Verkehrsunfällen und der damit verbundenen Tätigkeiten verfügen. Ferner enthalten die Rettungsdatenblätter ausschließlich Informationen über Fahrzeuge, die zum Verkauf in Deutschland bestimmt sind.

Spezifikationen und Sonderausstattungen der Hyundai Fahrzeuge sowie das Fahrzeugangebot unterliegen stetig etwaigen Änderungen. Daher behält sich Hyundai inhaltliche Anpassungen bzw. Änderungen an den Rettungsdatenblättern jederzeit ausdrücklich vor.

Die in diesem Leitfaden enthaltenen Informationen sind nicht für Endkunden und ebenfalls nicht für Werkstätten und Händler bestimmt. Endkunden können den Bordbüchern ihres jeweiligen Fahrzeuges detaillierte Informationen zu den Funktionen ihres Fahrzeuges sowie wichtige Sicherheitshinweise zur Fahrzeug- und Insassensicherheit entnehmen. Werkstätten und Händler erhalten Reparaturinformationen über die ihnen bekannten Bezugsquellen.

A

• Accent (3-Türer)	LC	ab 2000
• Accent (5-Türer)	LC	ab 2000

	Brennstoff- zelle		Sicherheits- ventil		Abblas- richtung		Sicherungs- kasten

ix35 FCEV

Allgemeine Hinweise

- Fahrzeug mit elektrischem Brennstoffzellen-System.
Druckwasserstoffspeicherung.
- Initialer Sicherheitsabstand: **50 m**
- Bereich der **Wasserstoff-Abblaseeinrichtung** freihalten (rote Pfeile)
- Hochvoltkomponenten sind mit Warnaufklebern gekennzeichnet.
- Hochvoltkabel verfügen über eine orangefarbene Isolierung.
- Wasserstofftanks verfügen über elektromagnetische Absperrventile, manuelles Schließen nicht möglich.
- Hochvolt- und Wasserstoffsystem werden bei Unfällen mit Airbagauslösung i.d.R. automatisch abgeschaltet.
- Fahrzeug wie angegeben deaktivieren.

Fahrzeug immobilisieren und deaktivieren

- Gangwahlhebel in Stellung „P“ bringen
- Feststellbremse betätigen.

- Bei eingeschalteter Zündung:
 1. Bremspedal nicht betätigen
 2. Start-Stop Knopf einmal betätigen

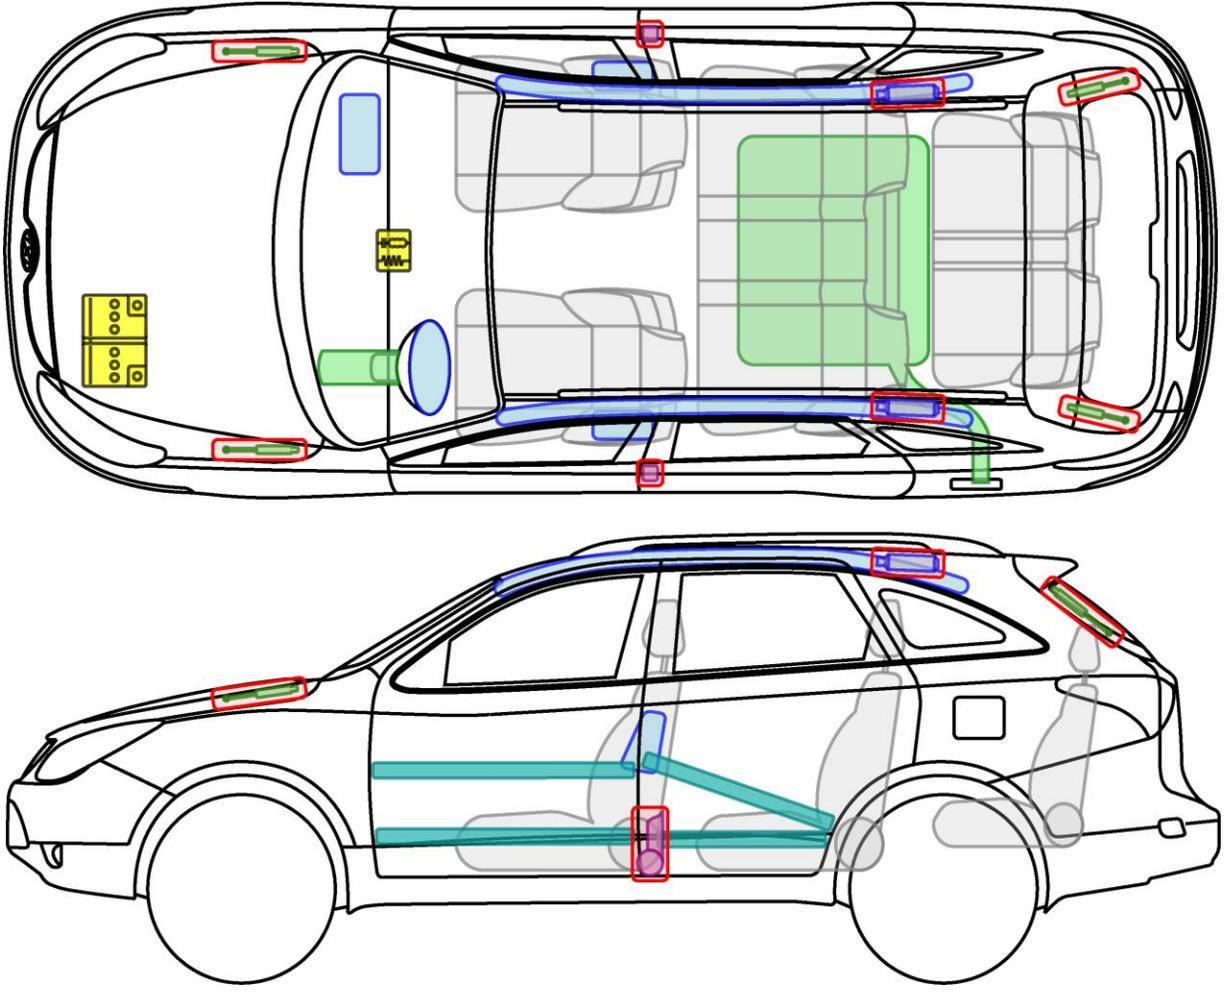

- 12 Volt Batterie abklemmen

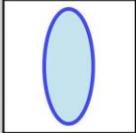

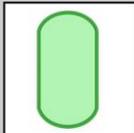

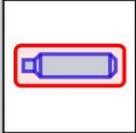

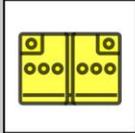

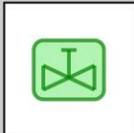

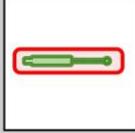

- Service Disconnect Stecker entfernen (isolierende Schutzhandschuhe bis 1000 V erforderlich)

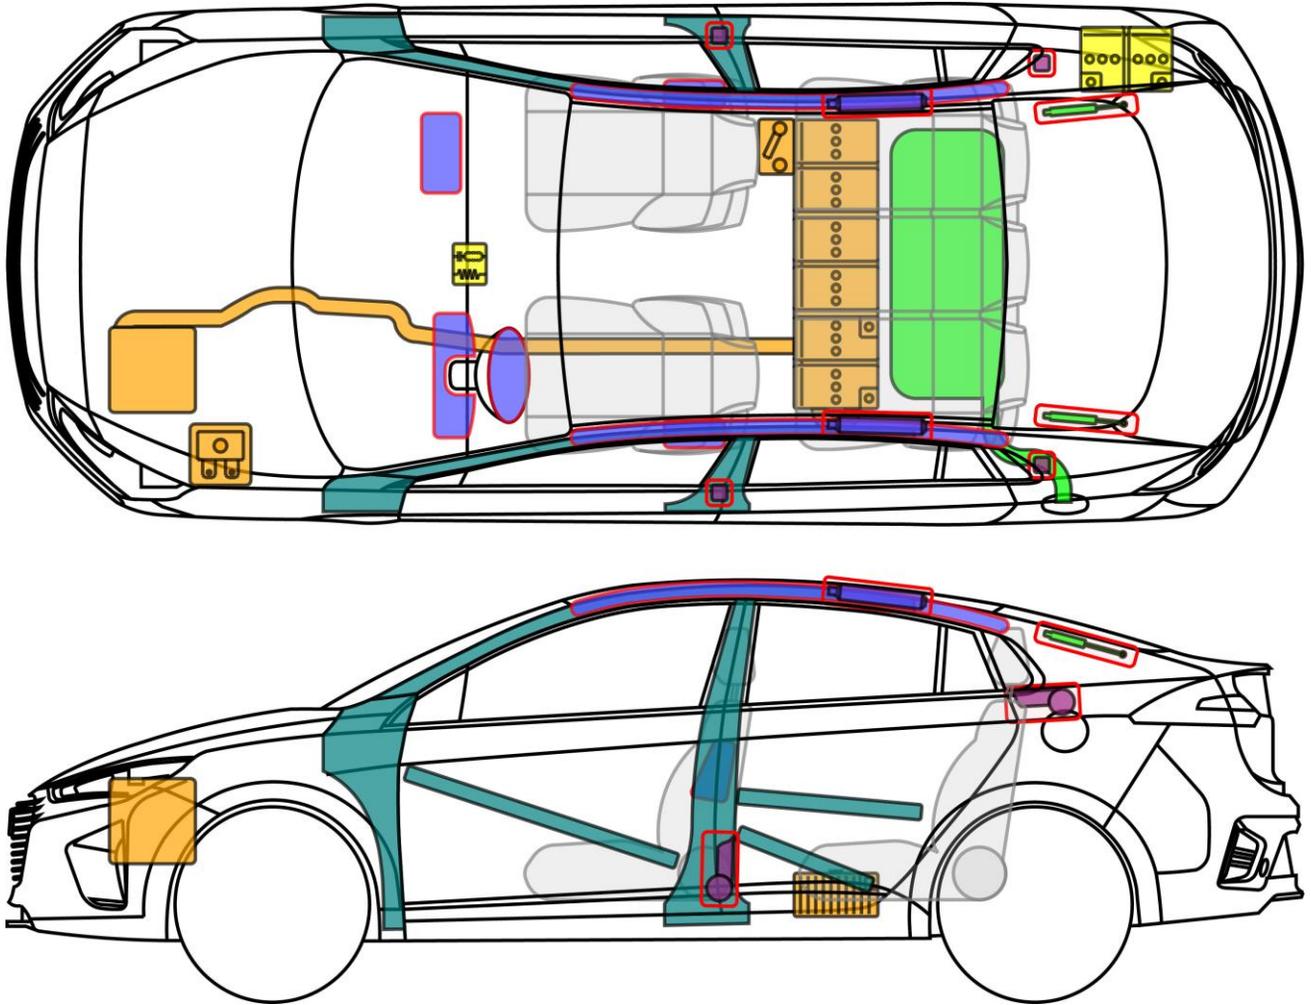

ix35 FCEV

Kona Elektro

Allgemeine Hinweise

- Bei Unfällen mit Airbag und/oder Gurtstrafferauslösung wird der Fahrzeugantrieb automatisch deaktiviert. Die Rückhaltesysteme sind weiterhin aktiv.
- Die Zeit bis zur vollständigen Deaktivierung des Antriebs beträgt 5 Minuten nach Durchführung der Deaktivierungsschritte.
- **Schutzausrüstung erforderlich (Isolierende Handschuhe bis 1000 V, Gesichtsschutz).**

Fahrzeug immobilisieren und deaktivieren

- Räder verkeilen, Feststellbremse betätigen und Taste P (Parken) drücken.

Methode 1:

1. Prüfen ob das Hochvoltsystem eingeschaltet ist. Symbol:  .
2. Ist das System aktiv, Start-Stopp Knopf einmal betätigen.
3. Massekabel der 12 Volt Batterie abklemmen.

Fahrzeug immobilisieren und deaktivieren

4. Notfalltrennkabel im Motorraum trennen.

Wenn der Notfalltrennkabel nicht erreichbar ist:

Service Disconnect Stecker wie dargestellt entfernen (isolierende Schutzhandschuhe bis 1000 V erforderlich).

Ist der Start/Stop-Knopf nicht zugänglich,
Methode 2 Folgen!

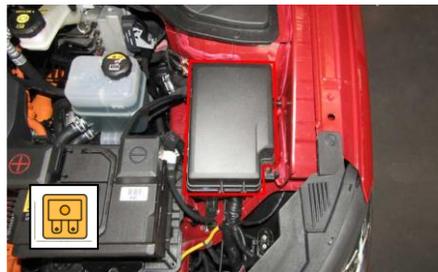

- **Kann die 12 Volt Batterie nicht abgeklemmt werden, sind die Rückhaltesysteme weiterhin aktiv!**
- **Achtung: Die Spannung im Hochspannung-Systeme sind erst nach ca. 5 min. vollständig deaktiviert!**

Fahrzeug immobilisieren und deaktivieren

Methode 2:

1. Dargestellte Sicherungen aus dem Sicherungskasten entfernen.

2. Massekabel der 12 Volt Batterie abklemmen.

3. Notfalltrennkabel im Motorraum trennen.

Wenn der Notfalltrennkabel nicht erreichbar ist:

Service Disconnect Stecker wie dargestellt entfernen (isolierende Schutzhandschuhe bis 1000 V erforderlich).

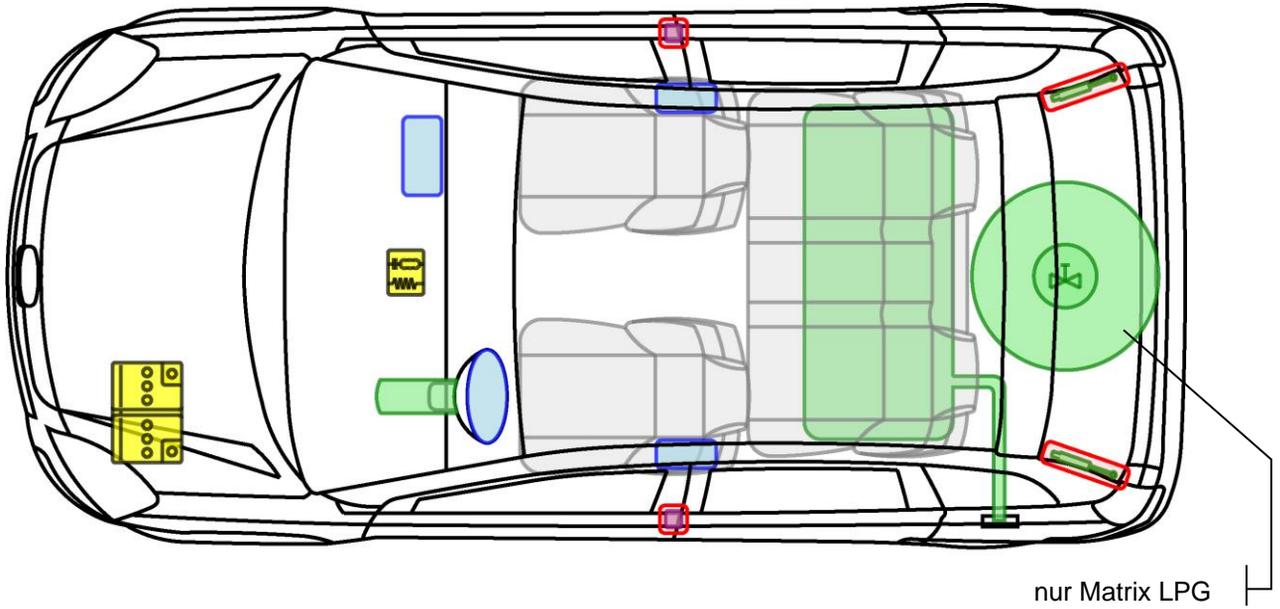

Fahrzeug immobilisieren und deaktivieren

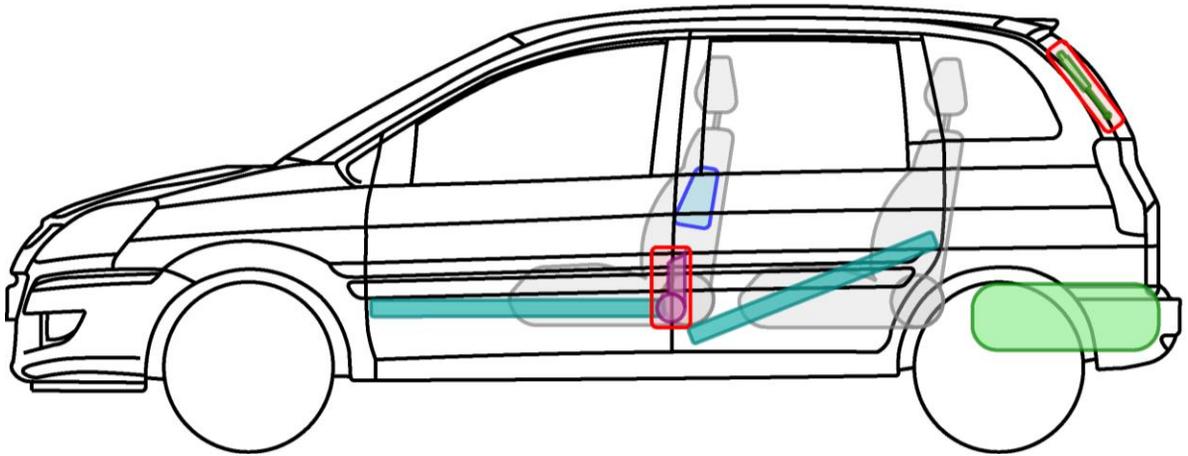

Service Disconnect Stecker wie dargestellt entfernen (isolierende Schutzhandschuhe bis 1000 V erforderlich).

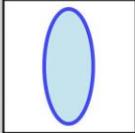

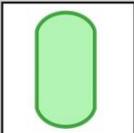

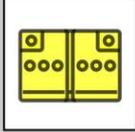

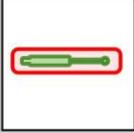

- **Kann die 12 Volt Batterie nicht abgeklemmt werden, sind die Rückhaltesysteme weiterhin aktiv!**
- **Achtung: Die Spannung im Hochspannung-Systeme sind erst nach ca. 5 min. vollständig deaktiviert!**
